

SUMMARY

This course is intended for flight crew operating CPDLC and ADS equipped aircraft. It covers the components and operation of Controller-Pilot Data Link Communications (CPDLC) and Automatic Dependent Surveillance (ADS) equipment. These systems are part of the Future Air Navigation (FANS 1/A) system, now in common use throughout the world.

The course is available in versions customized for Boeing and Airbus aircraft, showing typical installations and operation for each type.

TARGET POPULATION

The CPDLC / ADS course is designed for experienced Airline Pilots (operating Airbus or Boeing aircraft), requiring initial or recurrent training.

REGULATORY COMPLIANCE

- ICAO / EASA / FAA
- Maintenance compliance with IOSA standards

Versions Available:
Airbus
Boeing

Course Length:
1 hr 30 min
1 hr 25 min
